

Conference Feedback

Here is what some people wrote in their 2013 conference evaluations:

"This was my first time attending this conference and I was immensely impressed. The workshops provided a wide variety of topics, the presenters were all knowledgeable and the resources were valuable. I look forward to reviewing your website to review slides from workshops I could not attend. I will definitely try to attend your 2015 conference and those that follow. Bravo to you!"

"Too many valuable aspects of the conference to mention. It was all good and every plenary session & workshops I attended had relevance to my work and organization."

"Learned so much about so many things."

"Interactions with peers & experts. Reinforced shared opportunities & challenges. Sharing perspectives & strategies. Best use of a conference."

"The ability to sit in workshops specific to healthcare systems that I work in . . . The opportunity to network with others sharing resources, dialogue, discussions . . . REAL topics covered by REAL experts."
